

September 13, 1992

Hello everyone,

In our haste to get things rolling and put the player lists in your hands as quickly as possible, a couple of errors were made. I apologize for those oversights as well as the name typos on some players. Please make the following corrections to your player draft list:

- o Add CHICO CARRESQUEUL 1000 AB to the list of shortstops.
- o Delete VIC WERTZ from the list of outfielders. He is correctly listed as a 1st baseman.

Remember to list all the players at each position using the back of the form when needed.

As I was working on my draft list today, I noticed how difficult this draft process really is. While you know exactly what a player will do over his career, this must be balanced with the need to cover each position with sufficient at bats and pitchers with starts. As Tom Falduto said, "This really puts importance on guys like Billy Hunter". Yes it does, so give that consideration when filling out your draft lists. We should have enough players to cover each position but someone is going to have to use Lou Limmer no matter what!

We also overlooked putting deadline dates on the schedules. Each series will consist of 6 games. Your instructions must reach your opponent by the 5th of each month. Your disks and series recap sheets must also reach John Turnbull by the 5th of each month. I have enclosed updated league schedules with this information as a friendly reminder. You may replace the previous schedule with this most recent version.

Good luck with your player choices but remember only one of us can get Mantle!

If anyone has any questions and better ideas, please let me know.

Best,

Jim
