

**SEASONS PAST BASEBALL
1955 SEASON**

08/22/1993

PLAY BALL!

Enclosed you will find the official version of the Seasons Past Baseball League 1955 Season Disk. The rosters are now set for the season and as last year I ask that you do not alter this disk in any manner as it would create problems with the stat keeping.

Some of you may notice that the Steal and Jump ratings of your players are slightly different from those on the previous disk. The reason for this is that Tom Tippett has provided a program that not only automatically recalculates these ratings but also regenerates the event table to accurately achieve league and player strikeout/walk totals. As many of you know, these totals have been drastically low in past replays. This program also prepares the disk to be compatible with PTP Version 5.0 and will be run on all the past season disks that PTP will be offering. Now the negative ??? side effect of this program is that it also resets the l/r averages back to .000 or 0.00. Again this is done in anticipation of version 5.0 where the l/r split will only appear when the player is created via the Elias event table.

STAT KEEPING

We will use the same procedure as last year for reporting stats. To review, after each month's games make two (2) copies of the league files onto two (2) separate disks. It is easiest to use the *.* copy method that was outlined in last year's initial newsletter. I have enclosed that page with this mailing. If you have any questions concerning how to perform this function, please contact either myself or John Turnbull ASAP.

ETCETERA

Take note of the new address list that has been enclosed. Several managers have made address or phone number changes so please replace your old list with the newest one.

Also review the League Constitution before the season begins keeping in mind that the new player limits and roster sizes will now be in effect. And finally, pay close attention to the schedule as each team will have a month or two where the sequence of home and road series will be uneven.

Good Luck!!!
