PLAYER DISKS

The player disks which accompany this newsletter are now official and cannot be modified. Please do not change roster spots, names, ratings, etc. as those changes may result in the stats being corrupted.

STAT REPORTING

There still seems to be some confusion in the stat reporting procedures. I suggest that each of you make 2 directories on your hard drives, one to play the games on, and one to keep year to date stats. At no time should the stats on the year to date directory be

zeroed out. However, the stats in the directory where you play your games must be zeroed out after copying the month's game stats onto two (2) separate disks which will be sent to John Turnbull. Please contact me if there is any confusion over this issue as this stat reporting procedure will form the backbone of our league.

BACKUP MANAGERS

We currently have one back-up manager and he is the former sports editor of the Baltimore newspaper. He is:

John Sears
2708 Overland Ave.
Baltimore, MD 21214

If you know of anyone else who may be interested, please let me know.

COMPUTER MANAGER

Also creating some confusion is the role of the computer manager and the manager profile worksheet which has been provided. Using the computer manager format and/or the profile worksheet form is optional. If you would rather have your games played by your opponent instead of the computer manager, do not use the manager profile worksheet. Instead submit your own set of instructions outlining how your team is to be managed. Again, the computer manager is optional at the discretion of the visiting manager.

On a final note, three teams having only 29 players were assigned players that had been cut by other teams. They were:

Cascades-M. Picone
Flyers-N. Escalara
Saxons-J. Fanning

Now all 14 teams have 30 players each.
